PROFILE

Backend-focused full-stack developer with hands-on experience building scalable Django applications featuring role-based access, RESTful APIs, and secure authentication. Skilled in database design, API integration, and deployment with tools like Nginx, Gunicorn, and AWS EC2. Passionate about writing clean, maintainable code and continuously learning new technologies.

PROJECTS

Project 1
MeBlog – A Multi-User Blogging Platform

A dynamic blogging platform where anyone can write, share, and engage with blog posts in a fully authenticated, and interactive environment.

Project 2
Ecommerce-Platform – A Scalable Multi-Vendor E-commerce Platform

Built a full-stack e-commerce platform with custom roles, and integrated product, order, and messaging systems with role-based permissions.

Project 3
Connectly – A Social Media App (In Development)

Connectly – A sleek, modern social media platform designed to help you share, connect, and grow your network with ease.
